COVID-19 TESTING

Per the New York State Department of Education's guidance to schools for reopening, *Recovering, Rebuilding, and Renewing: The Spirit of New York’s Schools*, “it is strongly recommended that schools comply with CDC guidance and not conduct COVID-19 testing or require testing or antibody testing of students or staff members. The decision of whether a test needs to be conducted should be determined by a healthcare provider or the local department of health. *CDC Interim Considerations for K-12 School Administrators for SARS-CoV-2 Testing* Schools should identify who in the community is responsible for referring, sourcing, and administering testing (e.g., local health department testing site, physician offices, hospital system) particularly in the event that large-scale testing at the school is needed. Schools wanting to perform COVID-19 testing must apply and be approved as a limited service laboratory (LSL). Please refer to the instructions and application materials, and if applicable, the worksheet for multiple locations.” Therefore, Questar III BOCES will not be testing individuals. A list of regionally available testing locations is available on the Questar III BOCES website at [www.questar.org](http://www.questar.org) for individuals that may want to be tested on their own and at the end of this plan. Questar III BOCES health care professionals will refer symptomatic individuals to their primary care provider (PCP).

SYMPTOM SCREENING PROCESS

In the event an individual screens confirmed for COVID-19 symptoms while at school, meaning that they have a fever, or appear symptomatic while at school with any of the [COVID-19 symptoms identified by the CDC](https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html), they will be placed in an isolation area. For students, parents/guardians will be called to pick the student up from school immediately. Staff members will be asked to leave the school facility immediately. Individuals will be referred to their primary care provider (PCP) for evaluation. If the primary care provider (PCP) determines that the symptoms are not COVID-19 related, a note from the primary care provider (PCP) stating such diagnosis must be provided in order to return to school or work. If the primary care provider (PCP) determines that the symptoms are COVID-19 related, testing will occur.

It is imperative that individuals seek medical evaluation from their primary care provider (PCP) to determine whether or not these symptoms are related to a known or diagnosed condition other than COVID-19 (i.e. ear infection, allergies, etc.).

At the minimum, [New York State Department of Health Guidelines](https://www.health.ny.gov/diseases/communicable/coronavirus/covid19 Guidelines) requires “documentation from a health care provider following evaluation, negative COVID-19 diagnostic test result and
symptom resolution, or if COVID 19 positive, release from isolation.” If an individual tests positive for COVID-19, isolation protocols will be required and release from isolation will be determined by the local health department of residency. Any symptomatic student or staff awaiting testing results should self-quarantine and will not be allowed to return to school until released by a negative COVID-19 test result.

If an individual is confirmed as positive for COVID-19, isolation protocols will be required for 10 days per CDC guidelines. An individual must be in isolation for 10 days and symptom free for 72 hours before a release from isolation may be considered. Release from isolation will be determined solely by the local health department of residency. A release letter provided by the local health department of residency will be required for the return to school.

If a confirmed test result occurs, the county of residency will be notified by the laboratory performing the test. Individuals will be also be notified by either the initial testing facility or their local health department for negative results. The parents of any student who has tested positive must notify the school district as soon as possible. If this were to occur, Questar III BOCES will contact the county of residency for confirmation and collaboration in beginning contact tracing activities. The Questar COVID-19 School Resource Person for the school will coordinate with the local health department for contact tracing purposes.

In the event a student is under mandatory quarantine by the local health department, Questar III BOCES will provide remote learning for the student for the length of their quarantine.

**SCHOOL CLOSURE**

School closure decisions will occur in consultation with the local health department. This may involve the closure of a classroom or entire facility depending on the quantity of suspected and/or confirmed cases. There may be no need to close to a school building if the local health department determines that the identified close contacts are excluded from school and the facility may continue normal operations. Full closure of a school facility may be necessary in some situations and will be implemented on a case-by-case basis.
