Adding Another Account to Google Chrome

*Disclaimer: Some districts have NOT yet activated Google Classroom on their Chromebooks, and Classroom will not work for Questar students until this has taken place. If a student runs into any issues, please contact the helpdesk at helpdesk@questar.org. If the student can attach a photo or screenshot of the error, please encourage them to do so.

- Begin by opening the Google Chrome web browser.

- Select the initial in the upper right corner of the browser. You will see an option to “Add another account” below your name. Select that button to add another account such as your Questar account to your Google Chrome.

• You will sign into your Questar account with your provided email and password.
Adding Another Account to Google Chrome

- When you have entered your email and password, it will provide the option to “stay signed in”. If you are the only person to use this Chromebook, you can go ahead and select “Yes”. If you are sharing this Chromebook, select “No” so your account will not stay signed in.

- Google may have you verify that you are signing in with the correct email address. You will select “continue” once you confirm that it is your email address listed.
Now that you have set up your Questar account on your Google Chrome, you are able to switch between your multiple accounts. To change accounts, select the initial in the upper right corner of the browser. This will open the menu where you can switch to the other account by simply clicking on the other name.
